

**This is quite a long email containing a lot of information. Make sure that you read this email carefully BEFORE your first Maths lesson.**

**1. AquinasMaths Website – [www.aquinasmaths.com](http://www.aquinasmaths.com)**

We have a department website which contains all the resources needed for the course.

By clicking on the tab 'Courses' and then clicking on the page 'U6 A Level Maths' you will already find some resources from last year, including links to important websites.

There will be a password for some areas of the website.

Password: monkey

**2. Integral Website – [www.integralmaths.org](http://www.integralmaths.org)**

This website contains many useful resources, including walkthroughs, notes and exercises.

You each have an individual username and password. If you have forgotten either of these, send us an email.

Every username starts with '2053AL-' and ends with the first letter of your first name, followed by your surname.

**3. E-Textbook – [www.pearsonactivelearn.com](http://www.pearsonactivelearn.com)**

This website will give you access to the NEW course textbooks. There are 4 e-books which you can access on your phone as well as a computer. Again, you each have an individual username and password.

Your username is your Aquinas email address and your current password is changeme2018, which you should change straight away.

Example Username:   aq181234@aquinas.ac.uk

Password           changeme2018

**4. Initial Assignment**

You all received your first assignment at the Maths assembly. Don't forget to hand in your completed assignment at your first Maths lesson. If you need a copy of the assignment you can find it on the front page of the aquinasmaths website.

## 5. Study Packs

At the end of each week you will receive a study pack which is new for this year. In each study pack there will be a mixture of skill questions and exam questions on both current and past topics. There will also be blank pages on which you will need to do your independent study. You will choose which topics you will need to do more work on each week and use questions from the integral website and the e-textbook. You are also welcome to use other resources as well. You will have 1 week to complete each pack. Instructions on how to complete these packs will be on the aquinasmaths website later this week.

### A checklist of things to do this week:

- Check out the aquinasmaths website
- Log in to integral
- Log in to the e-books
- Complete the initial assignment and hand in at your first Maths lesson
- Buy a black mini whiteboard pen if you don't already have one
- Don't forget to bring your calculator

If you have any questions or any problems accessing any of these resources please send us an email: [maths@aquinas.ac.uk](mailto:maths@aquinas.ac.uk)

Good luck with your first week at college
